🛂 Job Seeker Visa (Germany) — Open to work

Summary

I'm a full-stack developer with 4+ years of experience building web apps — from clean, responsive frontends to solid backend APIs. I've worked across a wide range of projects as a freelancer, and I genuinely enjoy the problem-solving side of software. Currently based in Berlin on a job seeker visa, looking for my next role where I can contribute, learn, and grow as part of a team.

Education

University of Europe for Applied Sciences	BS
Software Engineering	Potsdam, Germany • Feb 2023 – Feb 2026
• Built projects covering backend development (Java Spring Boot), mobile apps (Flutter), and ML (stock price prediction).	
• Applied Agile methods in team projects; studied C++ for systems programming.	

Financial University	BS
Operations & Business Management	Moscow, Russia • Sep 2019 – Jun 2022
• Studied financial analytics, data visualization (R Studio), and ML for financial forecasting.	
• Used Bloomberg Terminal for market research and investment analysis.	

Experience

Freelance	Remote
Full-Stack Developer	Aug 2022 – present
Delivered 50+ projects for clients across industries, handling everything from initial scoping to deployment.	
Built frontend apps with React, Next.js, and Vue.js — always with a focus on performance and clean UX.	
Developed backend APIs using Node.js/Express, Python (Flask/Django), and Go for performance-sensitive parts.	
Managed containerized deployments with Docker and hosted apps on AWS and Google Cloud.	

Tinkoff Bank	Moscow, Russia
Financial Analyst Intern	Jun 2022 – Sep 2022
Supported data analysis workflows using SQL and Python to generate business insights and reports.	
Helped prototype dashboards and visualizations used by internal stakeholders.	
Worked across teams, turning business questions into structured analytical tasks.	

Projects

Vue + Vite + Appwrite Auth Starter Kit	Dec 2025 – present
• Created an authentication starter kit for fast web app prototyping — includes signup, login, password reset, and OAuth (Google, GitHub, Facebook).	
• Built a role-based dashboard for authenticated users; published on GitHub with clear setup docs.
